**Additional Prescribing Notes**

Trastuzumab:  
MUGA scan required prior to day 1 and then every 4 months during treatment.

Administer as a SC injection over 2-5 minutes.  
Alternated the injection site between the right and left thigh. New injections should be given at least 2.5cm from the old site and never into areas where the skin is red, bruised, tender or hard.

FIRST INJECTION: Observed for six hours after the first injection  
SECOND INJECTION: Observe for two hours after second injection  
SUBSEQUENT INJECTIONS: If no administration-related reactions are seen with previous injections patients do not need to be observed.

Paclitaxel MUST be administered with non PVC IV set infusion bag and 0.2micron filter.  
Dexamethasone IV pre-med can be reduced from 8mg to 4mg if tolerated
