Table discussion objectives

By the end of the session you will be;

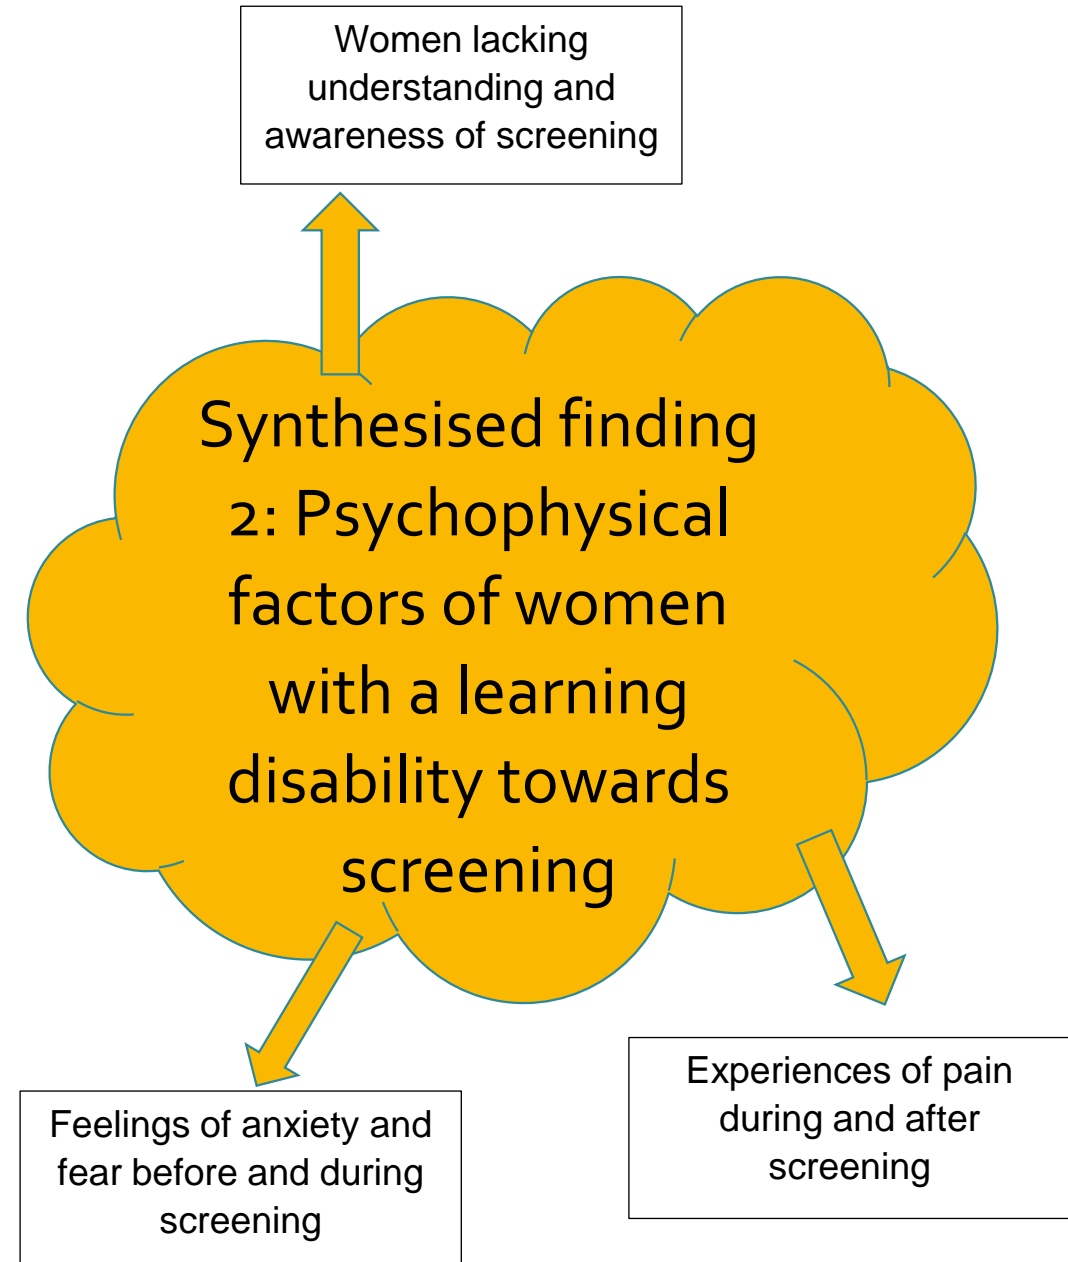

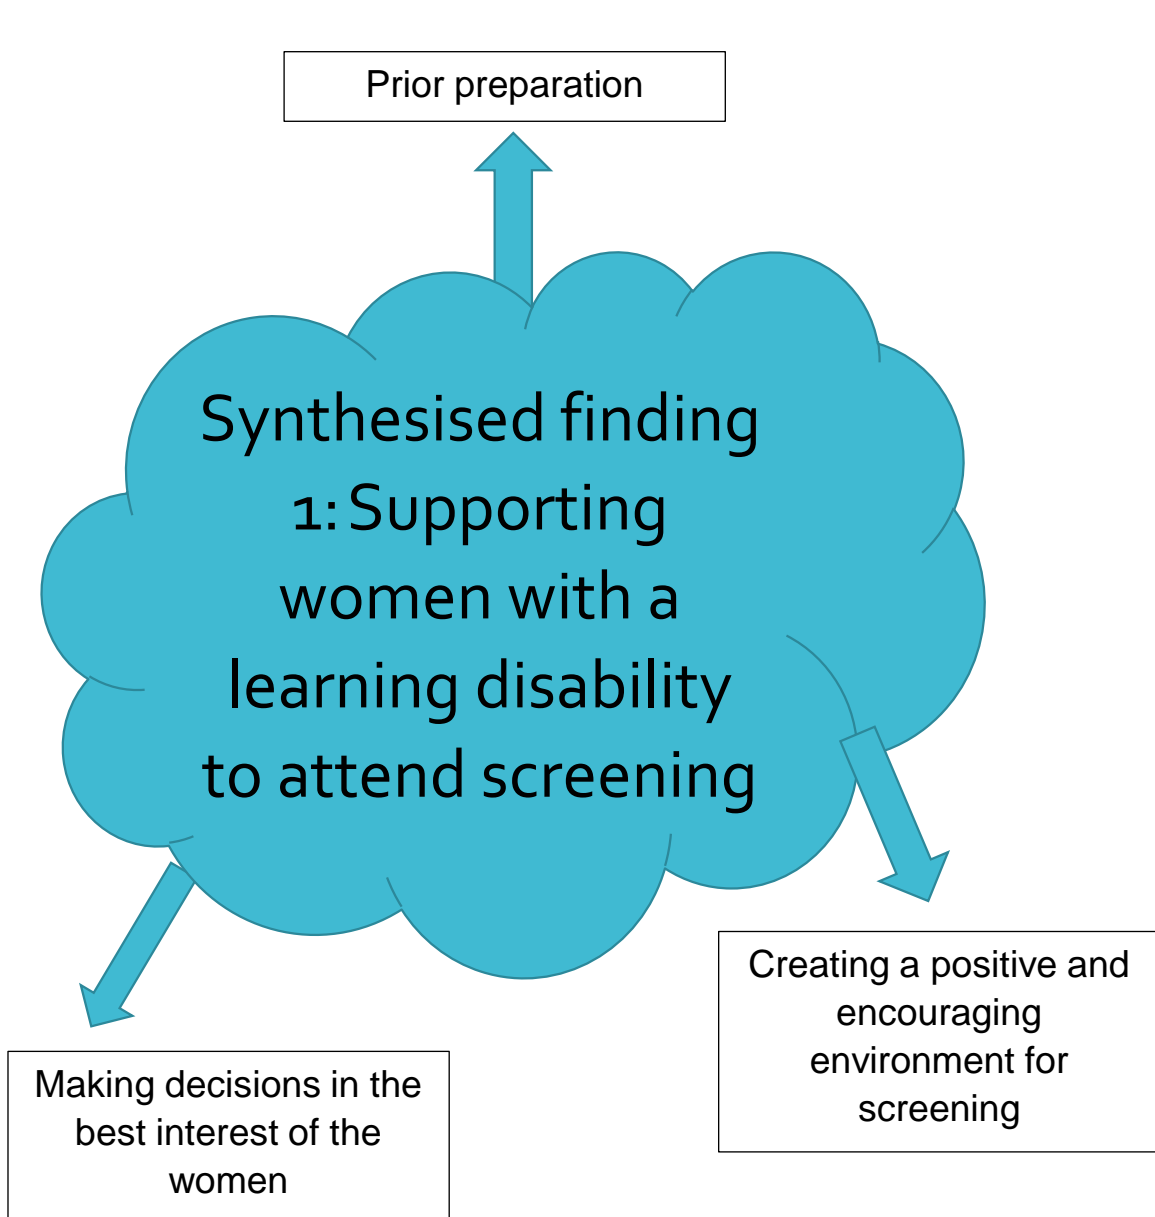

- Aware of current research being conducted with people with a learning disability.
- Understand the results of a systematic review of published literature looking at the attitudes and opinions of people with a learning disability, family cares and paid care workers towards cancer screening programmes

We will have;

- Discussed the results and how they relate to practice

Discussion point 1:

Whose responsibility is it to aid people with a learning disability attend cancer screening?

Healthcare professional knowledge

Synthesised finding 3:
Professional practice barriers and poor understanding of the needs of women with a learning disability

Importance of multidisciplinary working to ensure health of women with a learning disability

Learning disability friendly healthcare

Synthesised finding 4:
Methods and approaches to improve the potential uptake of cervical and breast cancer screening

The need for additional materials within the screening process

The need for more education for all.

Discussion point 2:

What do you think
about the results?

Discussion point 3:

Do the results fit with
your experiences?

Discussion point 4:

How do we priorities
the findings?
