## Local Approach

- As CCG we needed to understand the local picture on how cancer pathways worked, what the challenges are, what works well and what improvements are needed
- To do this we needed to bring a range of stakeholders together including the staff, public health and the voluntary sector, their perspectives and an indication of how they can work
- From that we formed a Steering Group who began the process of identifying priorities and agreed actions

...everyone affected by cancer and  
delivering the best possible patient  
experience.
