

Early Cancer Diagnosis DES for PCNs

Year Two (2021/22)

As the Early Cancer Diagnosis PCN DES moves into the second year your local Cancer Research UK Facilitators are here to support the continuation of your work

We can:

- Highlight the core changes and emphasis for the contract requirements for 2021/22
- Assist you to review the progress and impact of last year's quality improvement activities
- Support your community of practices to review outcomes and impact of last years' quality improvement work
- Kick start planning for this year
- Help you to understand your PCN cancer trends and identify areas of variation and turn them into quality improvement activity
- Support you to understand the impact of covid-19 and health inequalities on cancer screening uptake, referral patterns, routes to cancer diagnosis and patient presentation
- Provide easy access to quality improvement resources and materials and facilitate quality improvement planning and implementation
- Delivery of training and workshops on key topics i.e. improving screening uptake, referral practices and safety netting, changing cancer pathways
- Provide case studies and examples of the work from other PCNS
- We continue to offer our support to practices within PCNs to address variation, inequalities and provide care in communities where we know achieving early cancer diagnosis can be challenging.
- Supporting you with the Supporting Early cancer Diagnosis QOF QI module which will run in 2021/22

Further information on how your Facilitator can support you with the PCN DES and also the QOF QI module can be found [Here](#)

Please contact your local Facilitator to access support:
