

**Tom Kennedy**

I am Tom Kennedy, a GP Doctor in Training and Clinical Fellow based at North East and North Cumbria ICB.

I have been supporting the work of Luke Sayers to promote Continuity of Care in General Practice across the region. I am confident that high levels of continuity lead to better outcomes for patients, and more satisfying work for clinicians.

I have helped design educational resources for trainees around the spectrum of options to increase continuity and hope to spread an interest in the topic to the next generation of GPs.
